

ReSIST

Resilience for Survivability in IST

A European Network of Excellence

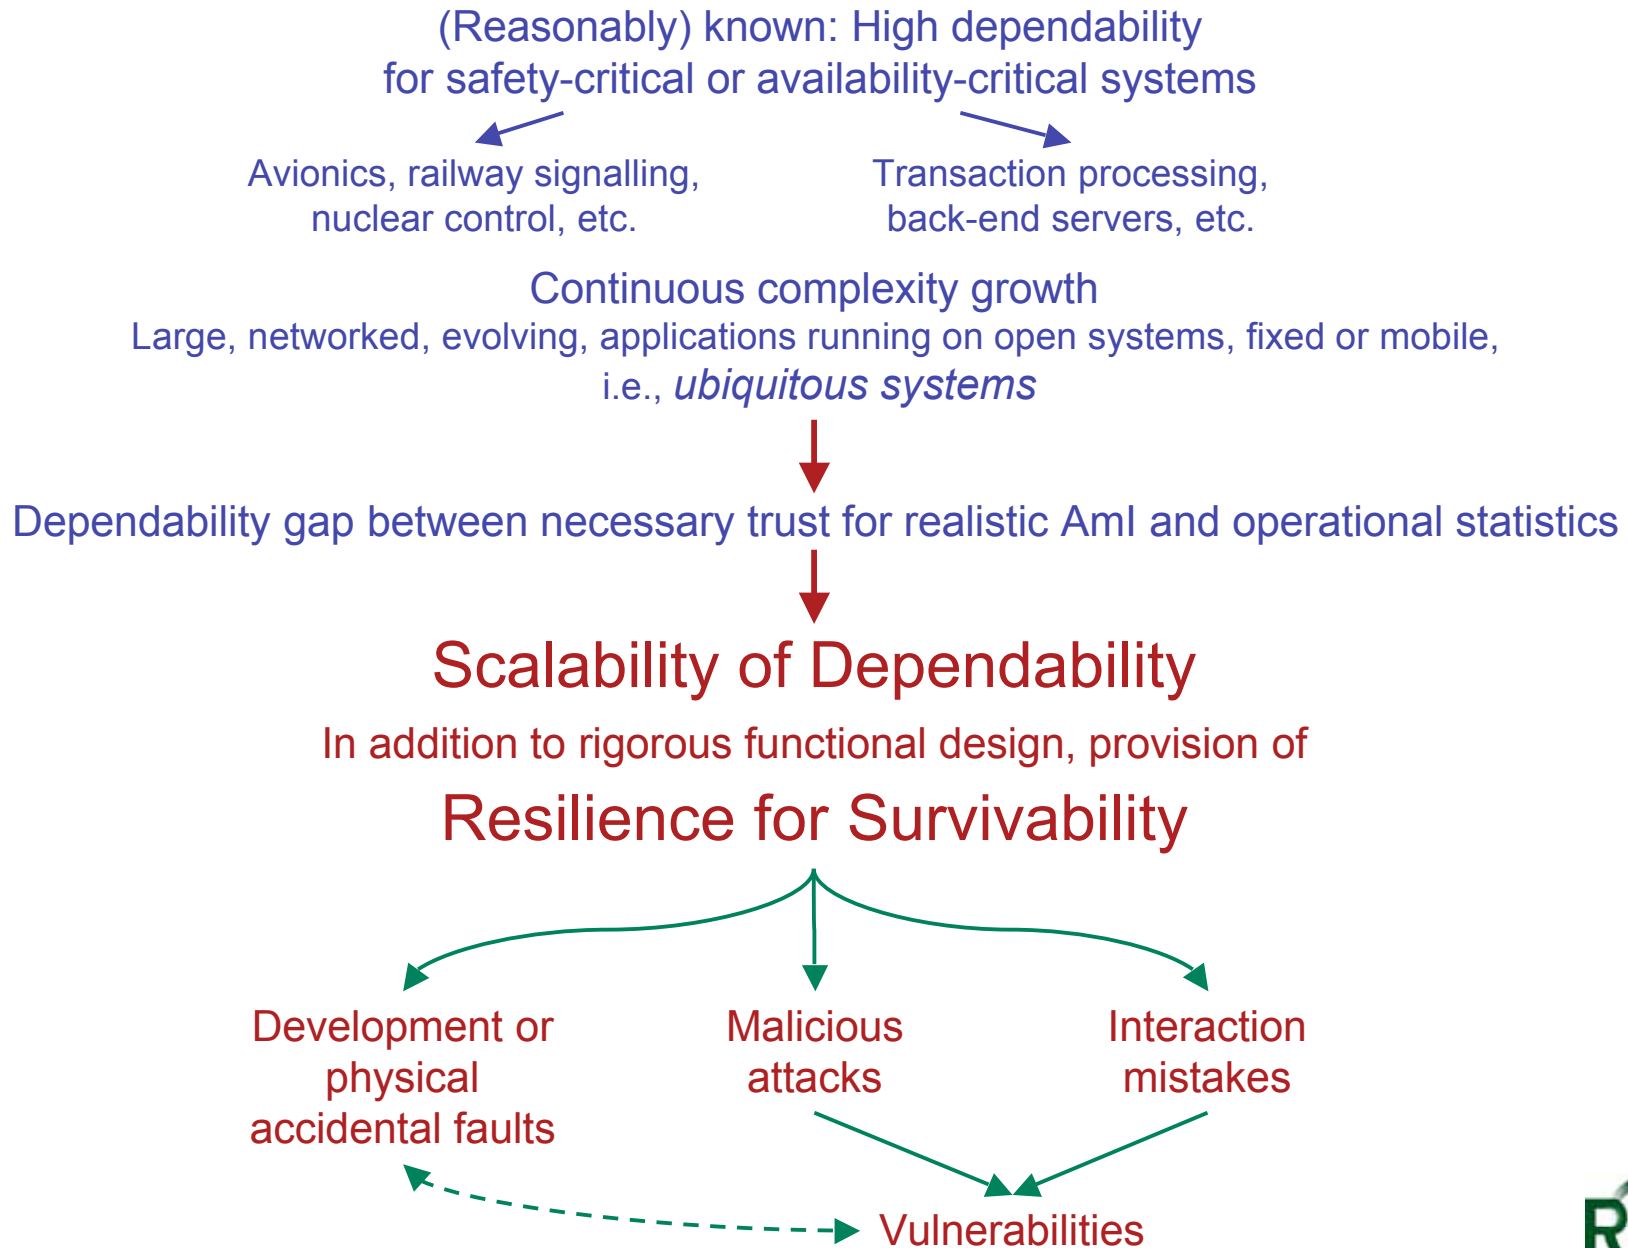

Information Society
Technologies

SIXTH FRAMEWORK PROGRAMME

- Rationale
- Logic
- Joint Programme of Activities insight
- Partnership

Rationale

Changes

Functional changes

Environmental changes

Technological changes

Dependability scalability

Dependability Scalability Properties

Dependability Extensibility

Dependability Composability

Dependability Adaptivity

Dependability Consistency

Resilience Scaling Technologies

Resilience Evolvability

Resilience Assessability

Resilience Usability

Resilience Diversity

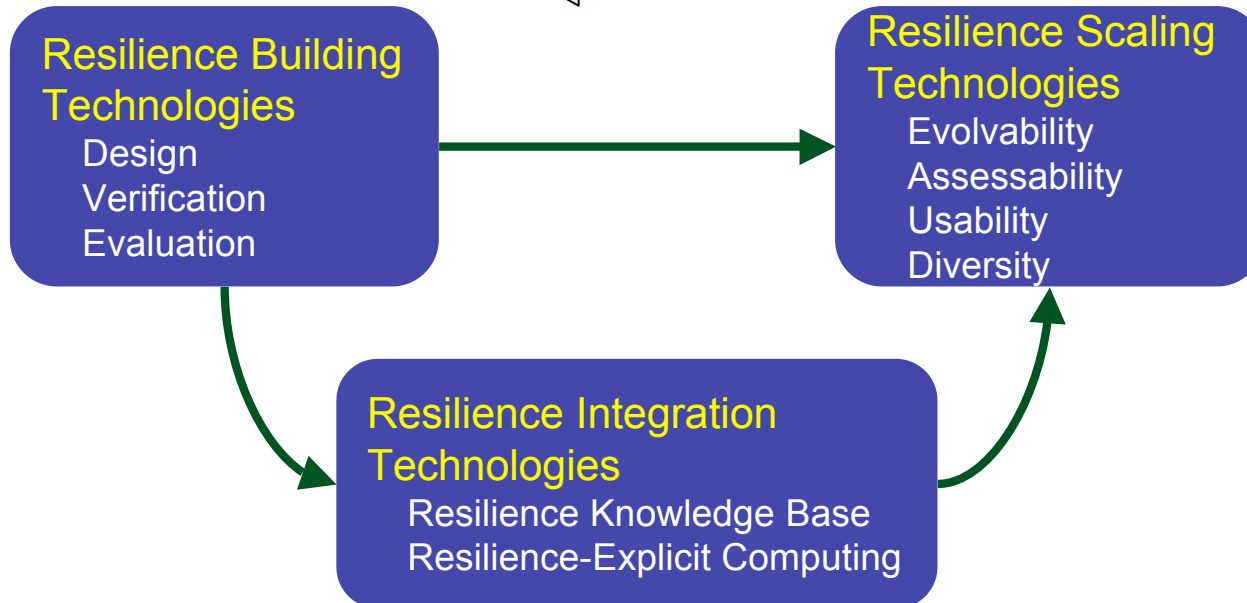

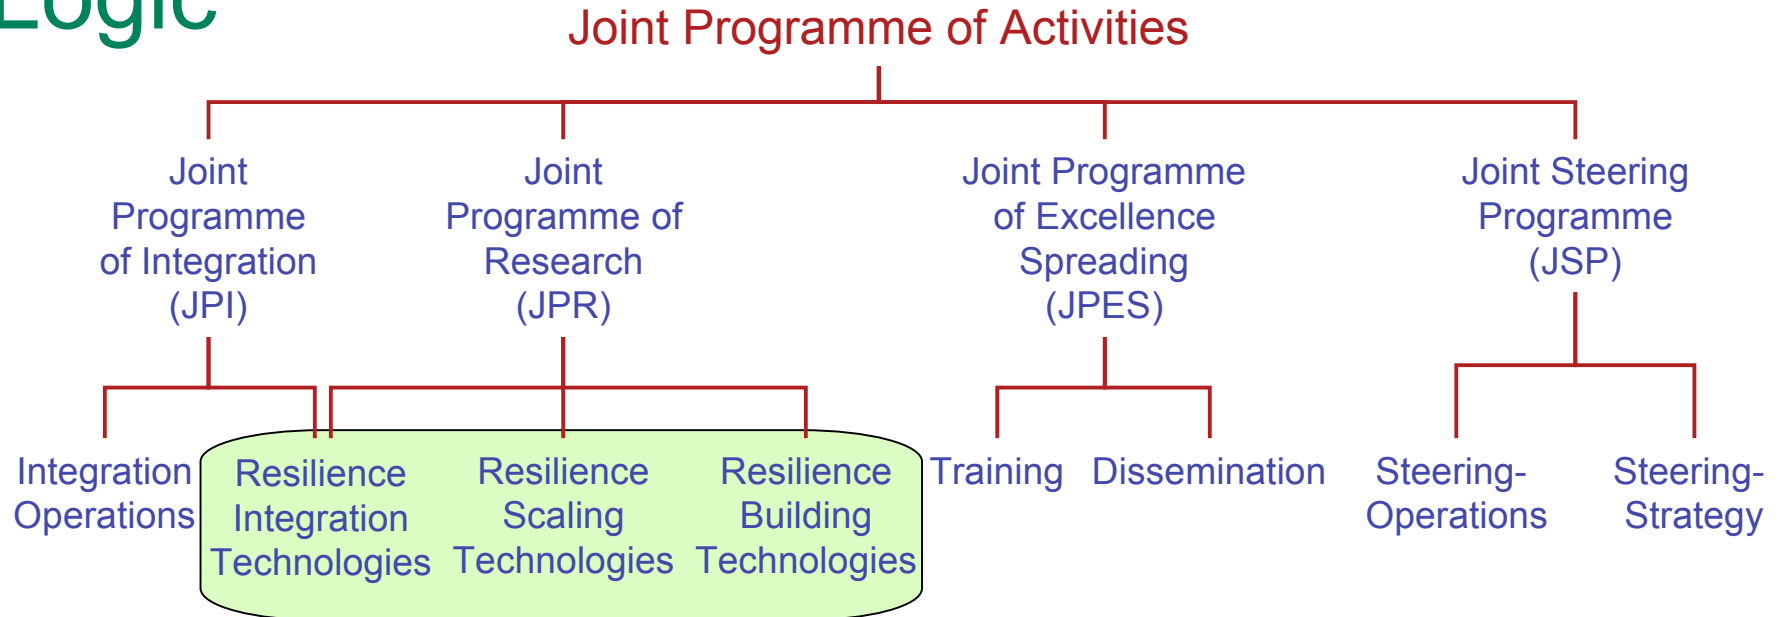

Resilience Building Technologies

Resilience Design

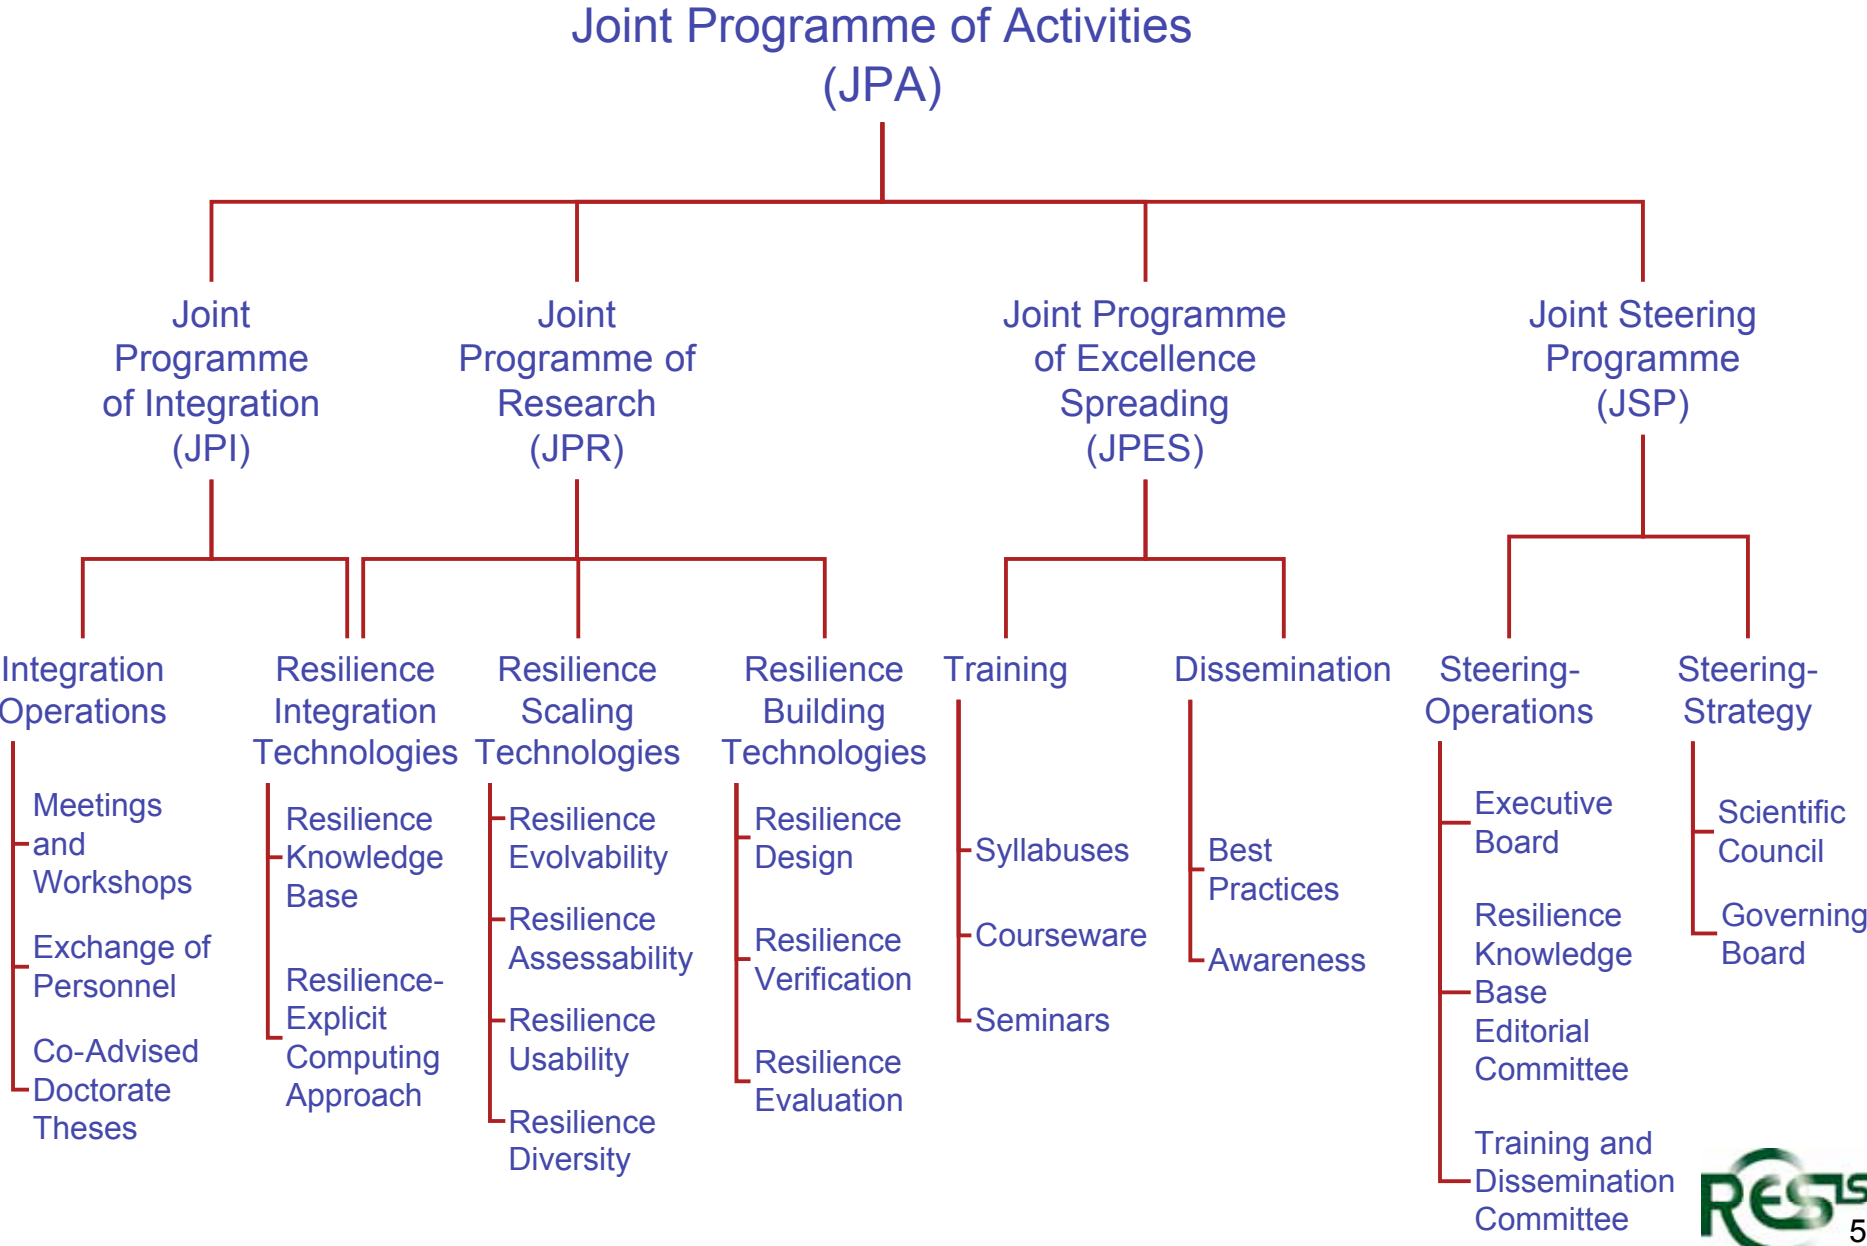

Resilience Verification

Resilience Evaluation

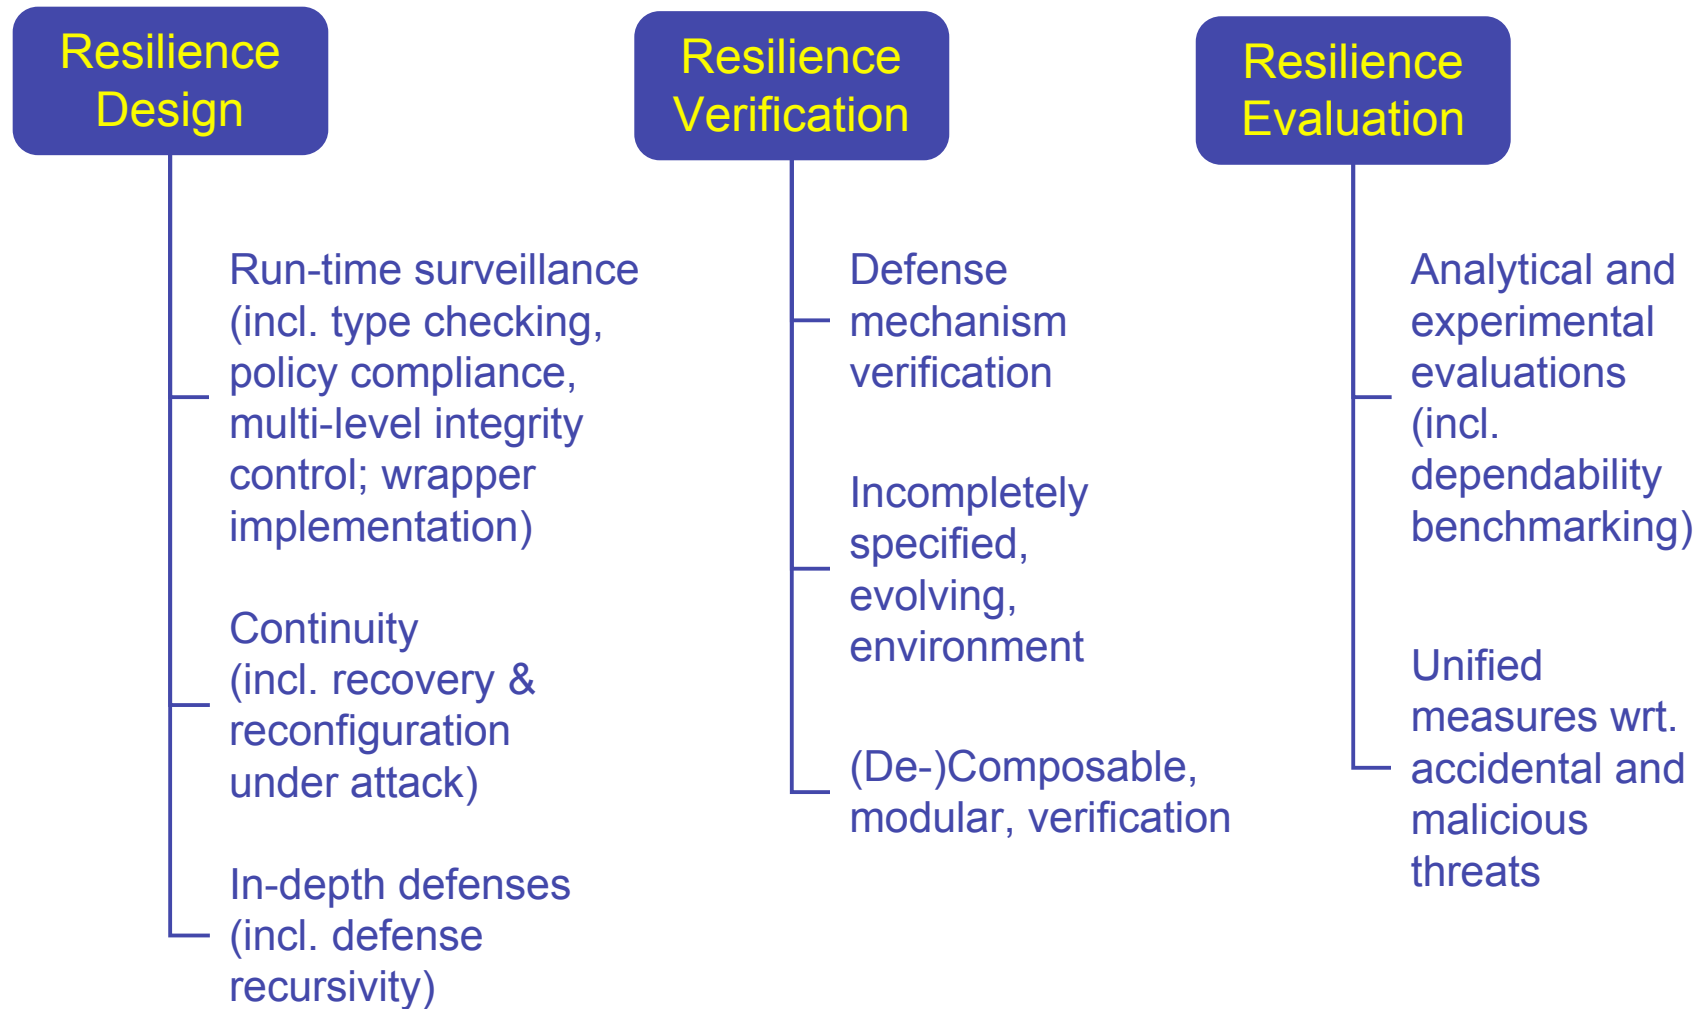

Logic

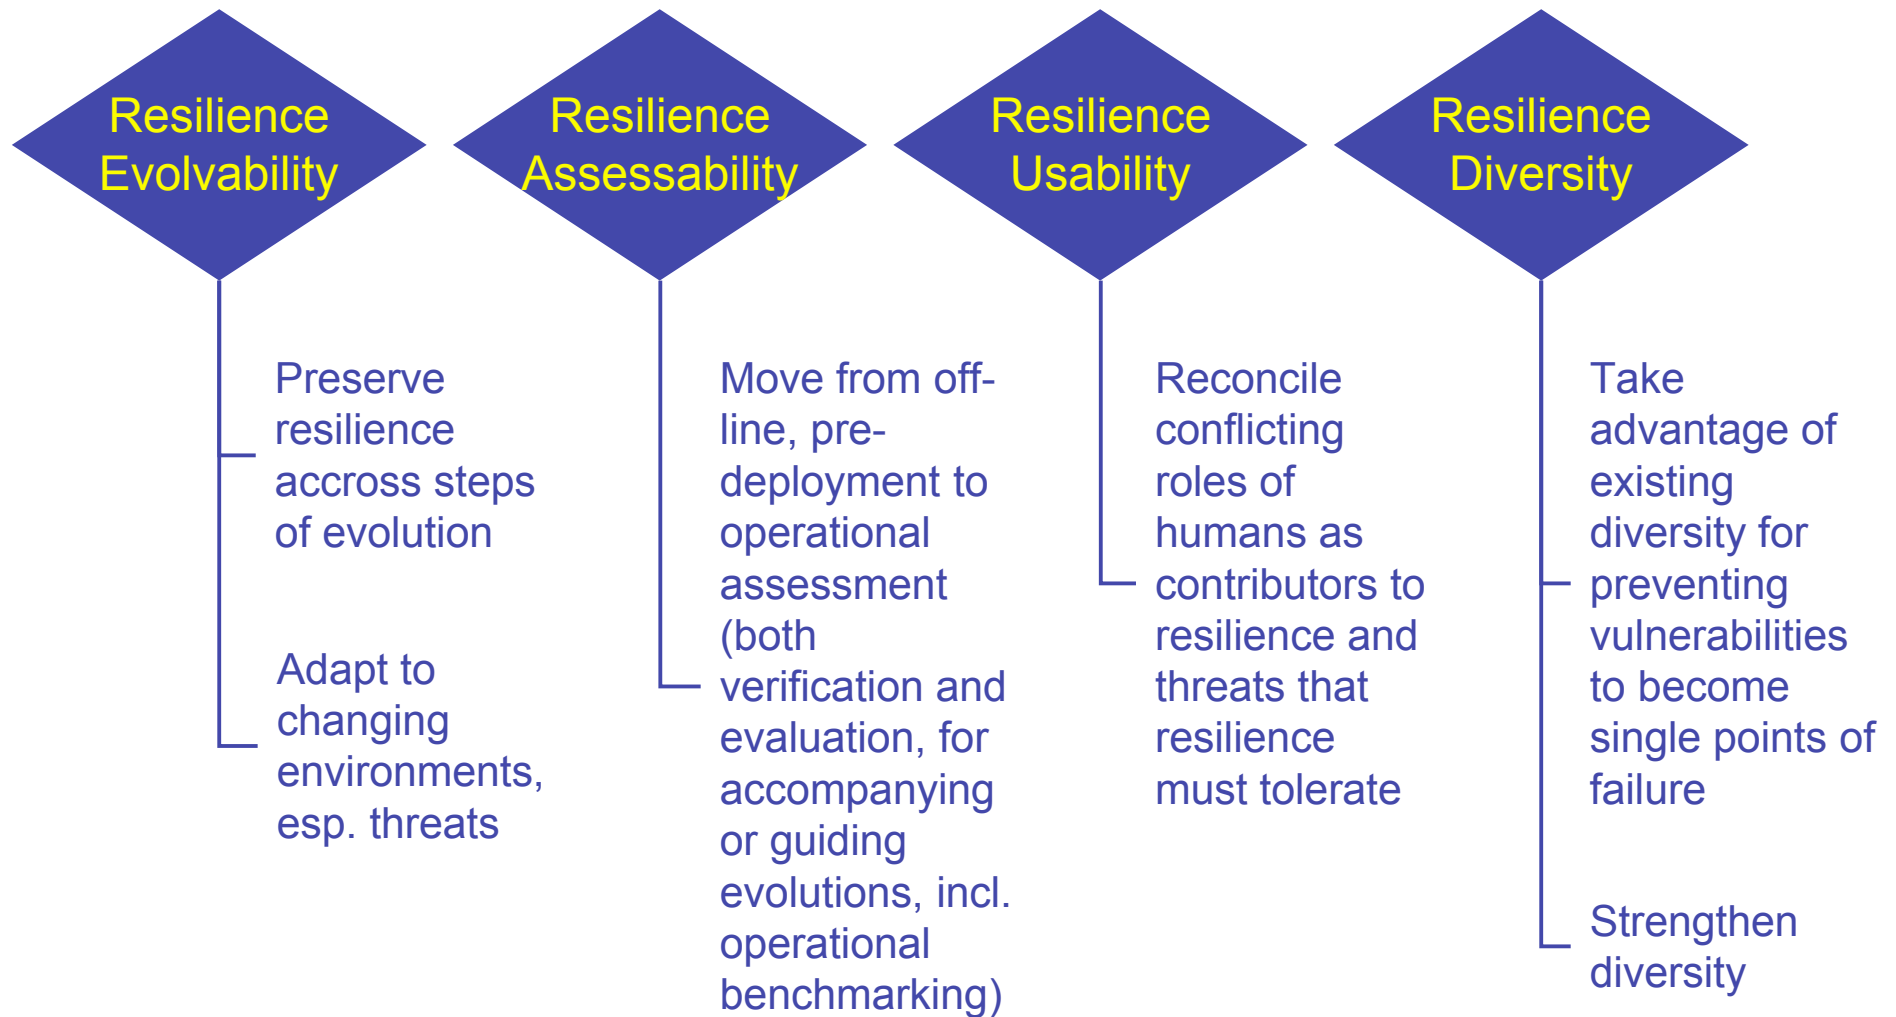

Joint Programme of Activities insight

Resilience Building Technologies

Resilience Scaling Technologies

Resilience Integration Technologies

Resilience Knowledge Base

Development of a representation of the relationships amongst the various dependability terms, i.e. a dependability *ontology*

Provide online-access to, and means of analyzing, a large amount of regularly (in the main automatically) updated detailed information on research projects

Resilience-Explicit Computing

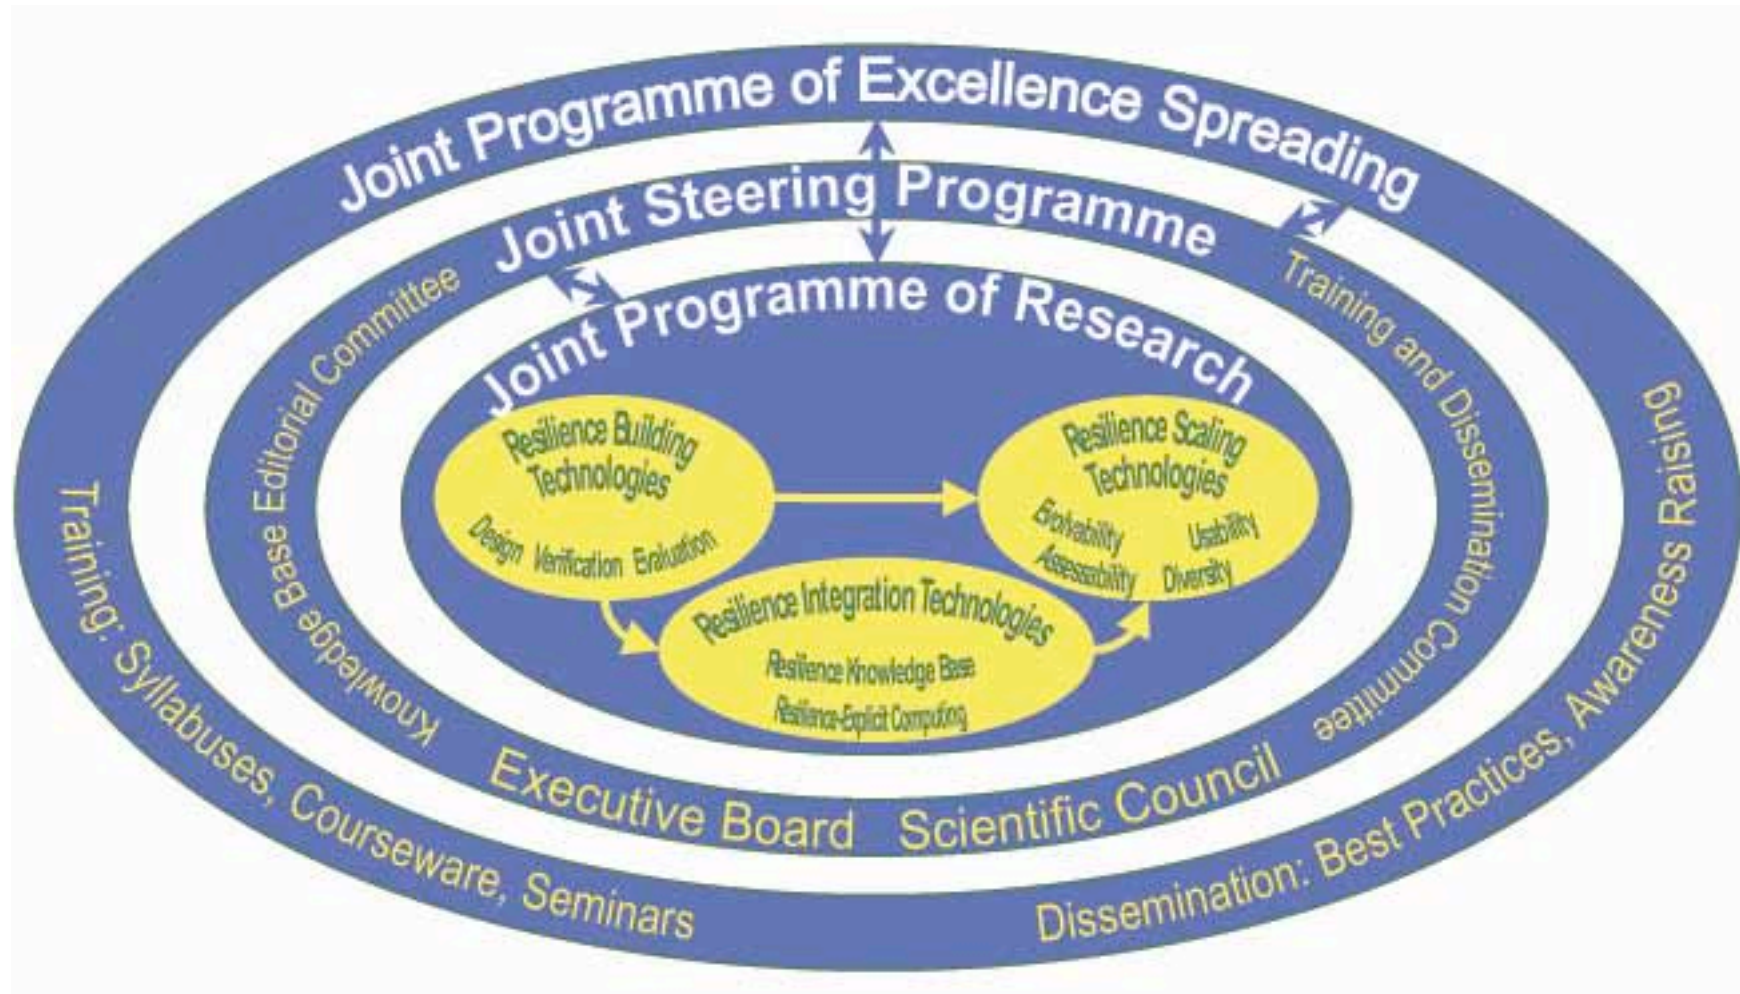

Creating and manipulating dependability meta-data, i.e. making explicit dependability-relevant characteristics of all artefacts (software and hardware components, data sets, documents, etc.) and processes involved in system development and adaptation

Requires the development of a *formal* dependability ontology

Partnership

	Expertise			Country	Academia (Ac) / Industry (Ind)	
	Threat resilience: development or physical Accidental faults (A) / Malicious attacks (M) / Interaction mistakes (I)					Mobile computing
	A	M	I

Southampton U.	Resilience Knowledge Base building				UK	Ac

71 researchers plus 44 students, 3 year duration

Scalably resilient policies, algorithms and mechanisms
for ubiquitous computing systems

Organisation

☞ Composition – Multidisciplinary for holistic approach

Partners' expertise — Threat Resilience		
Accidental faults	Malicious attacks	Interaction mistakes
13 [Ac: 11, Ind: 2]	10 [Ac: 7, Ind: 3]	5 [Ac: 4, Ind: 1]

☞ Management

☞ Event Schedule
